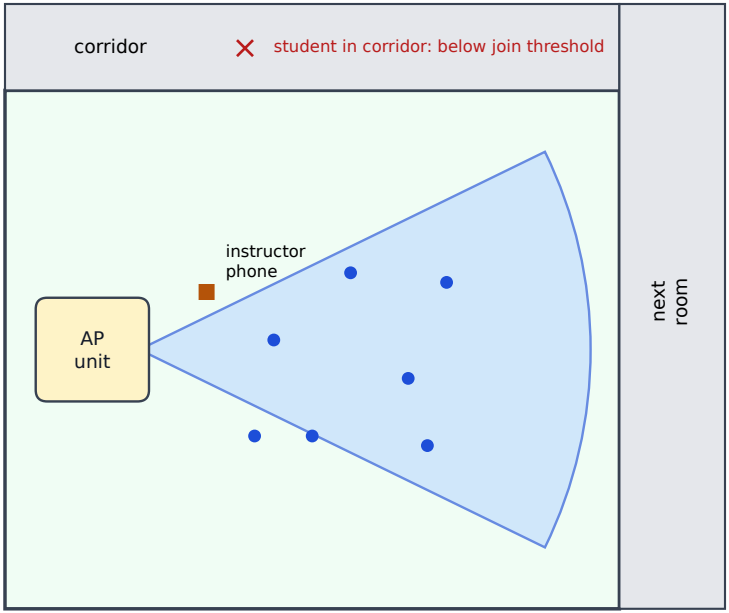
Proposed (not built): room-bounded access unit



sector antenna + limited TX power keep the cell inside the room

Access unit (one per room)

- Radio(s) + directional / sector antenna, TX limit
- Ranging: RTT, RSSI (FTM if the radio supports it)
- AirGated service DNS, HTTP(S), DHCP, face engine (NPU/GPU)
- Secure element: signs attendance records
- Local store (SQLite, audit)
- Optional uplink: sync to institution after class
